PROFESSIONAL SUMMARY

Frontend-focused Full-Stack MERN Developer with 11+ months of experience building modern, responsive web applications. Specialized in React.js, Next.js 16, and component-driven architecture with strong backend integration capabilities. Successfully delivered enterprise applications serving 500+ users with 99.5% uptime. Proven expertise in performance optimization (40% faster loads), UI/UX design, and implementing secure authentication systems. Proficient in building RESTful APIs with Node.js and MongoDB.

TECHNICAL SKILLS

Frontend (Core Expertise): React.js, Next.js 16 (App Router, Server Components), Redux, Tailwind CSS, React Hook Form, Zod, shadcn/ui, Radix UI

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, NextAuth.js

Database: MongoDB, Mongoose, Aggregation Pipelines, Schema Design

Tools: Git/GitHub, VS Code, Postman, Vercel, Cloudinary, MongoDB Atlas

PROFESSIONAL EXPERIENCE

Associate MERN Developer | Gravity Engineering Services, Raipur, CG

January 2026 - Present

- Architected HRMS Portal and Talent Management System serving 500+ employees with 99.5% uptime using Next.js, Node.js, Express, and MongoDB
- Built responsive dashboards with React.js and Tailwind CSS featuring real-time data updates, dynamic forms, and intuitive navigation across mobile and desktop
- Implemented JWT-based authentication with protected routes and role-based access control for Admin, HR, and Employee roles
- Leveraged Next.js SSR/CSR and MongoDB query optimization to reduce page load time by 40% and API response time by 62%

React Developer Intern | Gravity Engineering Services, Raipur, CG

June 2025 - December 2025

- Developed 20+ reusable React components following atomic design principles, improving team development velocity by 30%
- Integrated RESTful APIs with proper error handling, loading states, and data validation across 5 internal applications
- Optimized component rendering using React.memo, useMemo, and useCallback hooks, reducing unnecessary re-renders by 45%

KEY PROJECT

CollabXSphere — Influencer Marketing SaaS Platform | [Live Demo](#)

Next.js 16, React 18, Node.js, Express, MongoDB, Tailwind CSS v4, NextAuth.js, Zod, Cloudinary

- Built full-stack SaaS platform using Next.js 16 App Router with Server/Client Components, achieving 40% faster page loads through strategic component rendering and code splitting
- Implemented React Suspense with custom skeleton loaders to eliminate layout shift and improve perceived performance during data loading
- Designed responsive 3-column Brand Dashboard with campaign tracking, creator discovery feed, budget monitoring, and real-time notifications using Tailwind CSS v4
- Created reusable UI component library using shadcn/ui and Radix UI with consistent design tokens for accessible, theme-consistent interface
- Built 4-step brand onboarding flow with React Hook Form + Zod validation, persisting progress in session storage for seamless multi-page form experience
- Developed dual-role authentication system (Brand/Creator) with NextAuth.js JWT strategy, protected routes, and session-aware navigation

- Designed RESTful API with Express.js handling CRUD operations for users, brands, campaigns, and creators with JWT authentication and MongoDB aggregation pipelines for analytics

EDUCATION

Bachelor of Technology in Computer Science & Engineering (AI) | CGPA: 7.3/10

Shri Shankaracharya Institute of Professional Management & Technology, Raipur | 2021 - 2025

ACHIEVEMENTS

- Smart India Hackathon 2024 - College Finalist | Solved 100+ LeetCode problems (C++)
- Certified: Full Stack Web Development & React - The Complete Guide (Udemy, 2024)
- Active contributor to developer community, helping solve coding challenges and sharing technical knowledge
